

Catholic Social Teaching

IN OUR CURRICULUM

ECONOMICS

DIGNITY OF THE WORKER

Catholic social teachings in Economics emphasise interventionist supply-side policies, such as minimum wage legislation and improved working conditions. They highlight the importance of ethical stakeholder returns, addressing conflicts of interest, and combating workplace discrimination to promote fairness and dignity for all.

Economics classes focus on improving workforce life chances through education, skills, and healthcare. Topics include: minimum wage benefits and limitations, supply chain working conditions, profit distribution between shareholders and workers, and addressing workplace discrimination and exploitation.
