Early Years Practitioner

Understand key vocabulary

Key terms in the stages of development in a child.

Key concepts for physical, intellectual and social development.

How can you apply these in your NEA and exam answers?

Conduct research

The suitability of equipment /clothing for different age groups through observations and tests.

How to observe a child interacting with others. How a child develops physically, intellectual, and socially

The importance of play in how a child develops. How will you use this information when presenting your child observation report?

Link to other things you know

Healthy eating guidance for children (Food)

Designing appropriate meals for children (Food)

Using data (Maths)

Use data

What is the data telling you?

How can you use this data e.g. to suggest how a child is meeting / not meeting the norms for their age group
